

Year 4 2017 – A Year In Progress!

The students in Year 4 have come such a long way from our first week together. It has been a pleasure to witness their improvement in all areas of school, from working collaboratively in groups to sharing presentations together. Here are a few activities that the students have enjoyed together so far in 2017.

In Art, the students have been learning about the bicycle. They have identified its parts, drawn it from memory, published a good copy as well as design their own bicycle out of fine wire. It was a challenging task but fun to complete!

The students love any opportunity to research new topics and publish their work using technology. They have published texts, Power Point presentations and topic posters. They are improving their computer skills and enjoying their learning at the same time. Win Win!

Scope-It lessons have begun and it was a joy to see how much the students loved participating in this session. The aim for Scope-It is to allow students to become familiar with the skills of Coding, Robotics & Electronics which are necessary skills for our future employment.
